ABOUT US

We are an Environmental and Social Management Consultancy, established in Kenya, with a global scope of solution provision. We provide our clients with sustainable solutions that support them to achieve their goals and obligations whilst ensuring their projects contribute to a development that is sustainable.

We succeed by consistently understanding our client's needs, community and stakeholder dynamics, and using appropriate scientific techniques and social innovations to guarantee both Corporate and Community Sustainability.

We achieve, and assure our clients, quality by providing our solutions to international standards and innervating them to fit local requirements. As such, our solutions remain relevant over generations.

DIRECTORSHIP & MANAGEMENT

TerrCon was founded, and is led, by its Principal, Mr Nato Simiyu who is an Environmental, Social, Health and Safety Expert and a registered ESIA Lead Expert in Kenya. He holds a BSc in Maths and Chemistry, a PgDip in Environmental and Natural Disaster Management, and an MSc in Environmental Health Engineering. He is an ISO 14001 EMS Lead Auditor who is proficient in the management of environmental and social performance under different international standards.

His specialities in Natural Resource and Social Management encompass: Project Management, GIS & RS, Stakeholder Engagement and Risk Assessment & Management. He is experienced in working with GIIPs through which he has led projects and studies in industries such as: Housing, Infrastructure, Agriculture, Energy, Oil & Gas, Transportation, Water & Sanitation, Forestry and Health Care among others.

STAFF & GLOBAL EXPERIENCE

We house an experienced and creative family of committed staff who always endeavour to make a progressive difference whilst creating value for our clients. Our staff's proficiency covers the fields of: Environmental Management, Engineering, Land Surveying & Economics, Hydrogeology, Environmental Health & Safety, Sociology, Economics, Environmental Law & Policy, GIS & Remote Sensing, Ecology, Monitoring & Evaluation, Project Management, and Urban & Land Use Planning amongst others.

Our staff have been involved in projects in Kenya and other countries including: South Sudan, Rwanda, Tanzania, Ethiopia, Uganda, Somalia and Democratic Republic of Congo. In all these countries they have applied the highest international standards and met forebearing quality, health, safety and environmental requirements.

SOLUTIONS

We've built our capacity to solve the sustainability challenges facing our clients to support them in meeting their goals and obligations. Our solutions are segregated into the five classes outlined in this section.

For sustainability purposes, we always exploit any capacity strengthening opportunities in all our projects to ensure a complete transfer of good practices, knowledge and skills.

COMPLIANCE & INVESTMENT

Environmental Health Safety Planning
Occupational Health and Safety Planning
Emergency and Disaster Management Planning
Due Diligence Assessment
Environmental and Social Management Systems
OSHAS 18001
Community Health & Safety Management and Planning
Environmental & Social Monitoring & Reporting
Energy Audits and Conservation Strategies
Corporate Sustainability Assessment
Corporate Sustainability Strategic Planning
Monitoring & Evaluation
Feasibility Studies & Environmental Design
Resettlement and Land Acquisition Planning

THEMATIC RESEARCH & ENVIRONMENTAL MODELLING

Environmental Modelling: Air, Water & Soil
Pollutant Transport & Fate Modelling
Environmental Impact Modelling & Simulation
Habitat Modelling & Simulation
Toxicity Assessment

COMMITMENT TO QUALITY

We manage the aspects and risks involved with our activities through an integrated Quality, Health & Safety, Social and Environmental Management System QHSSE MS. Through this system we produce and sustain quality whilst achieving our internal goals as well as adhering with our clients' and industry standards. Additionally, we manage our environmental footprint and our staff's welfare whilst also building our suppliers' and clients' capacities through this system. Therefore, we guarantee our clients delivery of quality outputs and outcomes, and a transfer of risk-management best practices.
